

Barrel Bruting Machine

A Parallel axis bruting machine (Maxi cut) for first/second bruting

Specification

Weight	: 38 Kg.
Dimension	: 630 x 510 x 310 mm
Supply	: 220 VAC, 50 Hz, 1 Phase
Load	: 400 VA
Lighting	: 12 V, 10 W

Functions

To barrel brute a pre-tabled diamond to form a cylindrical girdle for a Round Brilliant.

Salient Features

- Suitable for both, Sawable & Makeable.
- Silhouette viewing system with ergonomically designed graph to have better judgement of bruting.
- Two Stones can be simultaneously bruted.
- Beardless surface finish, requiring no further girdle finishing.
- Better control and safe operation adds to recovery.
- Single operator can run up to 10 Machines.
- Handles all sizes between 5 cents to 15 carats.
- Correct speed for every stone thru variable speed control.
- Can be used in conjunction with Lexus Dia-Centring for fairly accurate control and doing away with poorly skilled operator.

Standard Accessories

- 13mm Die Pots : 10 Nos.
- 3 mm LN Key : 1 Nos.

Standard Accessories

- Bench for 8/12 machines with Suction System & internal wiring for individual machines.
