

Specifications

- Weight : 4 kg
- Dimension : 125 X 280 X 280 mm
- Supply : 220 VAC, 50 HZ, 1 Phase
- Load : 25 VA
- Lighting : 12 VDC, 10 Watts

Introduction

- This machine is used in conjunction with EconoBruter and Auto-Bruter to assist straight gluing of the diamond, so that, the bruted girdle surface remains perpendicular to table surface.
- By using the silhouette screen with user-friendly graph, a better judgment can be reached by the operator. And he can have a fairly accurate judgment of final result.

Digital Girdle Marker

- This machine is used to set the diamond during gluing before it is heat cured in the oven.
- Suitable for round as well as fancy shapes.
- Accurate gluing for diamond with table-line setting.
- Silhouette viewing system with ergonomically designed graph to have better judgement of bruted diameter for maintaining required total/crown/pavilion height.
- Skilled operator can be done away with.

Standard Accessories

- LN Key (T-Handle) - 3mm - 1 No.
- Hammer - 1 No.

Extra Accessories

- Glue Bottle (6 Gm.) - 1 No.
- Die - 1 No.
