

Ultimate Scaife Flatness

Specifications

- Weight : 135 kg
- Dimension : 800 W X 800 D X 720 H mm
- Supply : 415 VAC, 50 HZ, 3 Phase
- Load : 0.375 KW (0.5 HP)

Features

- Lapped scaife results in better surface finish and symmetry on polished diamond.
- Optimizes the production, by better surface contact with the stone.
- Ultimate solution for perfectly Flat scaife surface (accuracy 0.005 mm).
- Very low scaife – reconditioning cost (between Rs. 10 to Rs. 14 per Diamond Impregnated Scaife).
- Controlled material removal results in more number of reconditioning per scaife increasing scaife life by at least 50%.
- A low cost solution with a very short payback time.
- No dedicated operator required, reducing production cost.
